

# AVOID COMPLICATIONS

Protect your patient ...  
against Abdominal Compartment Syndrome

## CiMON

Decision making made easier

# CiMON

LCD screen

Freeze function for detailed pressure curve analysis

Combined feeding and intra-abdominal pressure probe

IAP trend indicator

Continuous IAP measurement

IAP trend display

Easy placement, can remain in situ up to 28 days

## CiMON – Continuous intra-abdominal pressure (IAP) monitoring:

- ➔ Prompt therapy decisions by continuous pressure monitoring
- ➔ Recognition of the effect of ventilator setting changes on IAP
- ➔ Superior to intravesical pressure measurement
- ➔ Reduction of infections
- ➔ User independent automatic measurement

## Don't loose time...

Find out how CiMON-Technology gives you true insight into your patients' intra-abdominal pressure. Contact your PULSION Representative or visit [www.PULSION.com](http://www.PULSION.com)!
